Do you have legacy client-server applications that you can no longer support or that are limiting your ability to satisfy current or anticipated business requirements?

QTECH Hybrid Systems Inc., a local IT consulting company, can help you avoid a risky and expensive rewrite by modernizing and re-platforming your existing code at a fraction of the cost and schedule.

Solution Overview

Transform and re-platform Client - Server Legacy Applications to n-Tier Platforms:

Transformation From:	Transformation To:
PowerBuilder	JAVA or .Net
Oracle Forms	JAVA or .Net
VB / VBA	JAVA or .Net
C / C++	JAVA or .Net
Centura	JAVA or .Net
Delphi	JAVA or .Net

- Based on Automated Tools and Structured Processes;
- Much more than a standard code conversion;
- Migrates application to the Client's optimal target architecture;
- Incorporates new functionality as required;

Solution Benefits

- Fraction of cost and schedule of a complete application re-write;
- Results in native style JAVA or .Net (no proprietary components);
- Allows for movement away from single vendor dependency;
- Eliminates Legacy Application Licensing Costs.

Why Choose QTECH?

- Project undertaken on a firm price basis (shared risk);
- QTECH can assist with all Phases of the Modernization Process:
 - a. Defining the architecture of your target platform;
 - b. Overall Project Management.
 - c. Business Requirements Generation;
 - d. User Acceptance Test Generation and Testing Oversight;
 - e. Ensuring that the modernized application is a feature for feature replacement for the legacy application.
- Our partner, has successfully modernized over 100 mission critical applications;
- We are experts with using the PWGSC SBIPS Supply Arrangement, assuring a Rapid Procurement Cycle.
